## ordering information

Copernic 2L

Reference	Balloon		Distal tip O.D. x length	I.D. (main lumen) / .024" (equivalent to VASCO+21) because of product part number	Double lumen outer dimensions	
	Max Ø (mm)	Length (mm)			Thickness	Width
COP2L 6x20	6	20	2,5Fx 12 mm	Ø 0,60 mm / .024" (equivalent to VASCO+21) because of product part number	Ø 0,9 mm (equivalent to 2,7F)	1,26 mm

Reference: 1. Contrast media viscosity under 9 cP - Internal data.

The COPERNIC 2L double lumen balloon catheters are intended for use in the peripheral vasculature and neurovasculature for temporary occlusion. The balloon catheters provide temporary vascular occlusion which is useful in selectively stopping or controlling blood flow and for the vasospasm treatment. The balloon catheters also offer balloon assisted embolization of intracranial aneurysms. They are also indicated for use in the peripheral vasculature and neurovasculature for administration of diagnostic agents (contrast solution) and therapeutic agents (embolization materials compatible with the inner diameter of the balloon catheters COPERNIC 2L). balloon catheter

  
inspiring innovation

# copernic<sup>2L</sup>

The newcomer with unique features

Designed for use in the peripheral vasculature and neurovasculature, provide temporary vascular occlusion, vasospasm treatment, balloon assisted embolization, administration of diagnostic agents (contrast solution) and therapeutic agents

## unique double lumen balloon design

- Flat catheter concept  
- ease of use
- Quick Inflation / deflation time<sup>1</sup>
- High visibility  
as balloons can be filled  
from 50% contrast media
- Unique double balloon catheter  
with an ID working lumen .024"

- Safety - easy valve
- Easy purging system  
Safety increased - reduced risk  
of blood aspiration

Large applications  
FARGOMAX6F

### Remodeling

Copernic 2L can be used  
in parallel with a coiling  
microcatheter (VASCO+10)  
in a single 6F guiding  
catheter (FARGOMAX6F)
